

Waimea Regional Safety Study

The State of Hawaii Department of Transportation is working with the community on the Waimea Regional Safety Study using a Planning and Environment Linkages (PEL) process. The PEL process emphasizes collaboration and integration during planning. The first community PEL meeting was held October 10, 2018. A report of that meeting can be found at the project website below.

The December meeting will discuss "Purpose and Need." The statement of Purpose and Need is integral to formulating and evaluating alternatives. It is used in any future environmental documents that may be produced. This will be an open discussion meeting and information on environmental, economic, and community issues are welcome.

Future Community PEL meetings will be held in early 2019. For further information, check the project website at:

www.waimearegionalsafetystudy.com

Please join us at the COMMUNITY MEETING 2
Wednesday, December 5, 2018
5:30 P.M. to 7:30 P.M.

Waimea Elementary School Cafeteria
67-1225 Mamalahoa Highway
Kamuela, Hawaii 96743
