

Waimea Regional Safety Study

**WE WANT
YOUR
INPUT**

The State of Hawaii Department of Transportation is working with the community on the Waimea Regional Safety Study using a Planning and Environment Linkages (PEL) process. The PEL process emphasizes collaboration and integration during planning. The first and second community PEL meetings were held in October and December 2018. Reports summarizing those meetings can be found at the project website below.

The PEL meeting in March will continue discussions on community needs. It will also start the discussions on ways to address those needs within the resources available to the state at this time. All input is welcome. Those who did not attend either PEL 1 (October 10) or PEL 2 (December 5) are encouraged to review those meeting summaries at the website.

Future Community PEL meetings will also be held. For further information, check the project website at:

www.waimearegionalsafetystudy.com

Please join us at the **COMMUNITY MEETING 3**

WEDNESDAY, MARCH 6, 2019

5:30 P.M. TO 7:30 P.M.

Waimea School Cafeteria

67-1225 Mamalahoa Highway, Kamuela, Hawaii 96743
